<b>Alternate Motors</b>				
	16	1/8	25	L
	12	3/32	22	M
<b>Code Key</b>				
*	Data from John Camp			
**	Data from Bob Goldie			
***	Data from Bucky Walter			

Bucky's motors are very long , in some cases, and require a prop shaft stop. The advantage is an exceptionally long motor run ( in some cases over 2 minutes).

The "Code" denotes a family of models that use the same motor. For instance, the Cleveland Gull and the Korda Open Road use the same motor (G).

No attempt is made to indicate torque when fully wound due to batch capability and individual winding techniques.

Thermals,

Gene Wallock
